Our objectives are to obtain reasonable assurance about whether the Statement as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Statement or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

PERFORMANCE REVIEW SNAPSHOT FY 2021

Faced with the challenges of the pandemic, the company accelerated its transformation to an "all-digital" services company, redefining the business models through innovation and leveraging the product portfolio optimally. Some of the drivers included:

- Rolling out a digital work-from-home solutions bundle that included television channels, special value-added services (including educational and other exclusive channels) and high-speed internet delivering speeds up to 1,000Mbps.
- Leveraging the broadband capability of the organization to optimally cater to the surge in demand – the business saw a huge growth of 87% in the customer base; growing from 0.329mn in FY20 to 0.615mn in FY21. In fact, NXT's broadband arm, ONEOTT Intertainment Ltd. added over 100,000 customers in the last quarter of FY21 alone.
- Working with broadcasters and last mile partners to create innovative content packages to cater to
 the changing consumer demand ranging from all-HD content packages to kids' content to
 economical infotainment packages. The efficacy is reflected in ARPUs; in the case of DAS3 markets
 (where the HITS platform has a significant base), ARPUs grew from Rs 144 in FY20 to Rs 151.
- Ensuring a strong business continuity plan to keep the operations going delivering uninterrupted customers services and maintaining a high level of quality of service for television and broadband.

Vynsley Fernandes, MD & CEO at NXTDIGITAL Ltd. said "This performance trains the spotlight on NXTDIGITAL, considering this was easily one of the most challenging years, which saw a significant impact on the media and entertainment industry. The stellar performance can be attributed to the company's focus on uninterrupted customer service during the lockdown and after, innovative products and solutions to combat the myriad of ground challenges, driving close to a 100% digital mode of collections on a prepaid basis and the unstinting and tireless efforts of all our employees and our Last Mile partners - all of whom rose to the occasion, without exception".

GROWTH DRIVERS FY 2022

The company will continue to focus on its transformation to an "all-digital" services company, driving a host of new products and solutions, whilst expanding into newer geographies.

One of the key growth drivers for the future will be its recently launched infrastructure sharing PaaS or Platform-as-a-Service offering. The Ministry of Information and Broadcasting last month permitted the

HITS platform to share infrastructure with other registered MSOs in the country. This progressive move of the government, akin to the successful model of sharing of mobile towers in the telecom space, will help competing MSOs reduce connectivity costs whilst improving the quality of service to customers. NXT, the only platform in the country which has been granted permission is looking to leverage the opportunity to provide its PaaS platform to MSOs – for which it will earn a fee income.

In line with the approval, the Hinduja Group's HITS platform has signed on SITI Networks Limited, one of India's largest MSOs with a connected customer base of over 8.5 million. SITI will leverage the HITS infrastructure to deliver its signals to its Local Cable Operators, thus providing its services to semi-urban and rural subscribers while also expanding its footprint across the country through satellite.

The potential market for such PaaS or infrastructure sharing services in India is estimated at over 60 million cable TV subscribers; connected to around 1,000 MSOs – largely independent or regional players, who face such cost and quality challenges. NXT is already in discussions with several MSOs, keen to leverage the PaaS solution to control their costs and improve their quality of services.

The company will continue to grow its broadband subscriber base – focusing on leveraging the installed customer base of the digital cable and HITS platforms; whilst simultaneously looking to expand its footprint.

Another key driver will be expanding the current coverage of the HITS platform to at least another 100 towns – through a unique networking model. The company also has plans to roll out new technology solutions and devices including high-end versions of the hybrid Set Top Box that will deliver linear television and streaming services, including OTT through a single device, seamlessly.

NXT continues to drive the government's mission and vision of a "digital India" by facilitating digital services across the length and breadth of India, covering over 1,500 cities and towns; with services extending to the Andaman & Nicobar Islands, Lakshadweep Islands, the far north-eastern reaches of India, through to Kargil, Ladakh and Jammu & Kashmir. It's focus on ensuring appropriate implementation of the "Make In India" and "Skill India" missions has seen a renewed focus in the past year – as the company moved to facilitate Last Mile owners across the country move to a complete model of digital and contactless service and support; including collection of subscription revenue.
