- 1. The above **consolidated** financial results of Multi Commodity Exchange of India Limited (the "Holding company" or the "Exchange"), its subsidiary (the Holding company and its subsidiary together referred to as "the Group") and its associate, have been reviewed by the Audit Committee and approved by the Board of Directors at its meeting held on July 24, 2021.

- 3. The novel coronavirus (COVID-19) pandemic continues to spread across the globe including India. COVID-19 has taken its toll on not just human life, but business and financial markets too. With substantial increase in COVID-19 cases across different parts of country, government have introduced a various measures to contain the spread of virus, including lockdown and restrictions on movement of people and goods across different geographies.

Certain establishment including commodities market intermediaries are permitted to operate and continue to remain exempted from restrictions. In case there is disruption in the functioning of commodity markets, the business of the Group may be affected.

The management has, at the time of approving the financial statements, assessed the potential impact of COVID-19 on the Group. Based on current assessment, the management is of the view that impact of COVID-19 on the operations of the Group and the carrying value of its assets and liabilities is minimal.

4. The Holding Company had entered into an agreement in August 2018 with a software vendor to develop a trading system for the spot market. As per the milestones, payments were made to the said software vendor from time to time. The Holding Company has incurred amount of Rs. 1978 lakhs on the said project. On account of non- fulfillment of the scope of the Project within the timelines and disputes arising between the parties, the Board constituted an empowered Committee to evaluate the financial and technical aspects of the said System developed by the said vendors. Further, the Holding Company had requested the said vendor, for amicable resolution of dispute, to complete the project without any cost escalation and provide knowledge transfer to Holding Company team for the amount paid thus far. Review by the Holding Company of the codebase of the trading platform developed by the vendor for the spot market indicated that the same has been developed on the design principles of extensibility, modularity and loose coupling. The codebase may be potentially used for the spot platform with additional enhancements. Hence, the Holding Company and the software vendor are in the final stages of reaching an amicable out of court resolution where by the Holding Company would be provided the rights to the trading software on the payment of the outstanding invoices. Accordingly the software vendor has extended the pause on the Singapore International Arbitration Centre (SIAC).

Further the Holding Company is also exploring other third party readymade solutions for the spot platform.
